ABOUT

Shoes are mostly used foot wear in nowadays so that's why I think I should sell shoes because it give me profit a lot and make a lot of money .sheos are most commonly used in the area where temperature are mostly down than room temperate it keep our foot safe and secure so I would like to say that it is very profitable business and by selling various type of shoes it can really make a lot money .

A **shoe** is an item of footwear intended to protect and comfort the human foot. Shoes are also used as an item of decoration and fashion. The design of shoes has varied enormously through time and from culture to culture, with form originally being tied to function.

There are a wide variety of different types of shoes. Most types of shoes are designed for specific activities. For example, boots are typically designed for work or heavy outdoor use. Athletic shoes are designed for particular sports such as running, walking, or other sports

ACKNOWLEDGEMENT:-

I would like to thank my mentor – prof Ashish Shrivastava sir for his advice and input on this project many many thanks to friend Kandan to help in this who spent a lot of time in making this project

INTRODUCTION:-

1. context

This project has been done as part of our course for the python programming. Supervised by Kundan Kumar. I have taken 1 month to create this project to fulfill the requirement in order to successes the project.

2. Motivations

Being extremely interested in web development I choose to develop a web designing website because I really felt it. and I also practice a lot in this field so I can say that it is quite very interesting to develop a project like that. Web development is very interesting for me I used html, CSS, Django, JavaScript. Complete my project.

3. Idea

As I practice a lot in web development, that why I got motivated to make a website because this is quite very inspiring and give more idea about web development

TEAM MEMBER: -

TEAM LEADER: -

KESHAV KRISHN

CONTRIBUTION: -

- 1.CODING**
- 2.GUI**
- 3.HTML**
- 4.CSS**
- 5.JAVASCRIPT**
- 6.OWL CARSOL**
- 7.BOOSTRAP**

3. KUNADAN KUMAR

CONTRIBUTION: -

- 1.1. HTML**
- 1.2. CSS**
- 1.3. JAVASCRIPT**
- 1.4. DJNAGO**
- 1.5. OWL CARSOL**

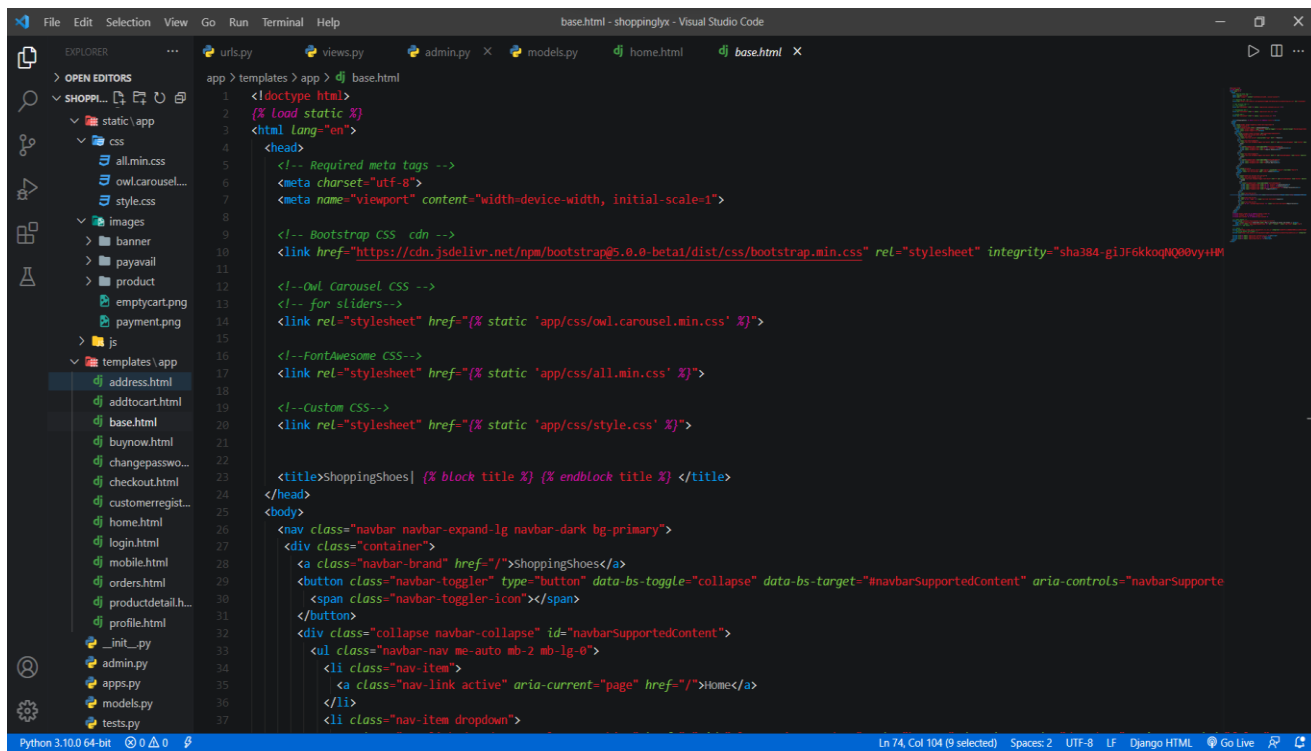

4. DESCRIPTION ABOUT WEBSITE: -

1.1 USE OF HTML:- HTML is the Skelton of any webpage it is use to give basic structure of the webpage I used html to create many pages in the app so the website looks easy and very easy for any coder to understand the code. I have created different html pages like: -

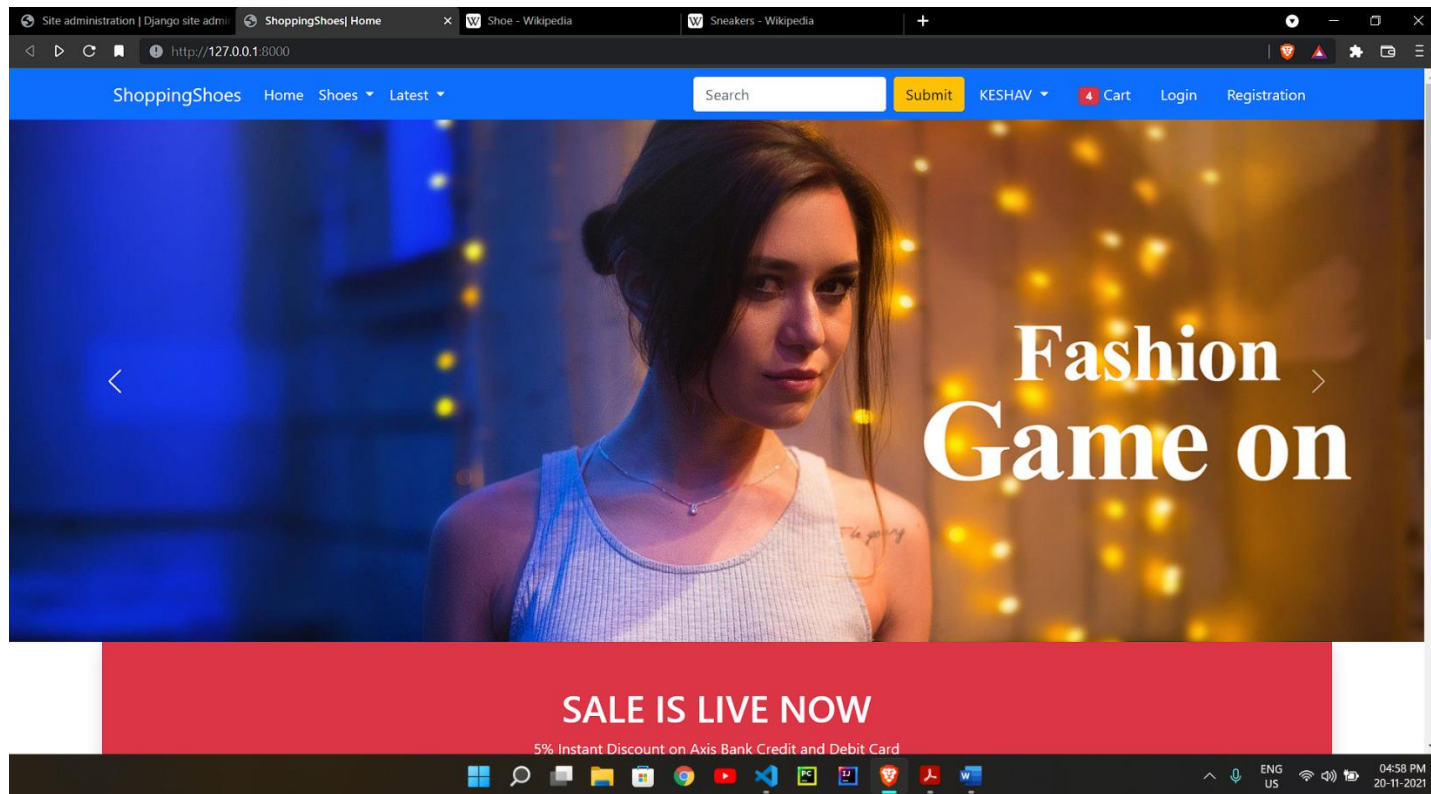

- 1.1.1. Address.html
- 1.1.2. Addtocart.html
- 1.1.3. Base.html
- 1.1.4. Buynow.html
- 1.1.5. Changepassword.html
- 1.1.6. Checkout.html
- 1.1.7. Customer registration .html
- 1.1.8. Home.html
- 1.1.9. Mobile.html
- 1.1.10. Login.html
- 1.1.11. Oders.html
- 1.1.12. Product detail.html
- 1.1.13. Profile.html

I have created single-single page to understand the coding of html code.

I have also link CSS and JavaScript and Django and other used webpage so that website work properly.

Code of the home page & Result

Home page of the website

Add to cart option you can add your product in your cart.

Product details you can actually see the details of product.

CSS:- CSS is the language we use to style the html document, css describes that how html document should be displayed.

Main use of the CSS is to give, style, format, color, import image, Design and much more.

JavaScript: -it is used to the behavior of the webpage.

Html to define the content of the webpage.

CSS to specify the layout of the webpage.

Alongside HTML and CSS, JavaScript is one of the core technologies of the World wide web. Over 97% of Websites use it client-side for web page behavior,^[13] often incorporating third-party libraries. All major web browser have a dedicated java script engine to execute the code on the user's device.

Django: - Django is the part of the python programming used in web page development so that it web page look alive, Django and JavaScript are mostly similar by their uses but there is a lot of differences also.

The Django Software Foundation, based in Lawrence, now owns the trademark and intellectual property that form the basis for the application that is used to create increasingly popular Web publishing programs, the likes of which are used by operations ranging from LJWorld.com here in town to The Washington Post and others worldwideweb.

What you can do in this website and how much it is functional: -

In this webpage you can login or register your email or email. And create your own account, by creating your own account you can transfer to the home page of the website. Where you can see the home page with a lot of product. Where you can see that there is lot of product to buy like, shoes, earphone, sneakers , deo, headphone ,mobile phone, and many more.

in the nav bar of the page you can see the logo of the website along with the home , shoes and latest shoes option where you can click and you will be directed to the page , and the left side of the navbar you can see the search option with a submit button ,with profile option where can actually show your option with the drop down menu where you can see the option of the profile , order, change password, and with the logout option.

And with the option of the cart where you can see your cart that you store in your website.

Login option is also their.

There is also a registration form also where you can register your account.

And in the down have created sale is live now option

Login: - to access the website you have to create your or register you're your account by email or by mobile number and can also set your password to login again, there is also an option of forget password in case you forget your password you can set a new password.

Home page:-Home page is the main page of the website with the 4 IMAGE which is in loop sliding from right to left and the description that.

Shoe deal of the day this where you can find all your shoes with product and the name of the product are not set name is just random name with price tag.

And there is also a trending product details with same shoes pics but in random manner and also but with different product price tag.

You can also see there is different payment option also available you can pay money buy different mode of cards,like :- credit card,debit card, upi transition, online banking, bajaj finense, cash on dilivey.

These are way you can pay the amount.

Slider:- I also introduced slider which slide in loop where you can actually see all product that you can buy. You can also select first product after clicking on the first product you can see the details of the product like the price of the product with the option of the no cost Emi ,with discount offer and aviable bank offer .so it make much easier to buy the product.

Add to cart:- buy clicking on add to cart you can see add to your cart where you can button of buy the product option. You can not buy the product but he option available to buy product. you can also see shipping charge also that is in right side.

And in the down of the page you can see the price of the

Buy now:- buy now option available when you can actually add your product to cart then you can buy product.
